One maybe two distinct seemingly natural large natural slab avalanches on small slope directly next to bridger canyon drive. One on the lookers left was likely cornice triggered, but on the right it's unclear to me if it propagated or released naturally.

Advisory Region
Bridger Range
Longitude
-110.91W

Latitude
45.72N
Avalanche Details: Avalanches on Bridger Canyon drive
Bridger Range, 2023-02-07
