Small natural avalanche Buck ridge

Buck Ridge
Northern Madison
2/27/2023
Code
SS-N-R1-D1
Aspect
N
Latitude
45.17030
Longitude
-111.37300
Notes

From USFS Snow Ranger Report: "We rode on Buck Ridge today to do some maintenance on our RAWS station for the fire folks and check on the yellow mule cabin. Where the wind hadn't blown it away yet, there was 4" of snow from over night on top of very firm snow, likely from the last round of wind. The most sheltered areas behind trees and down in the basins still had some deeper, soft snow and better riding. We saw one small wind slab avalanche in the new snow above Beaver Creek on a north aspect."
