

Snowcat triggered avalanche in Swan Creek

Swan Creek

Northern Gallatin

2/27/2020

Code

SS-AKu-R3-D3-O

Elevation

7800

Aspect

W

Latitude

45.37610

Longitude

-111.09400

Notes

GNFAC investigation: We went and looked at the avalanche that partially buried a groomer without injury to the driver at 8:15 p.m. the night before (2/27). The [slide](#) broke on facets at the ground and was 2-3' deep, 100' wide, and ran 600' slope distance. It put 8' of debris on the road cut. The slope was west facing at 7,500' and averaged 38 degree steep in the [starting zone](#). Weak snow at the ground is found throughout our advisory area.

The groomer triggered the avalanche when he was clearing a wind drift from the road. The groomer is badly damaged.

Crown: N45.38528, W111.06487, 7802 feet

Toe of debris: N45.38554, W111.06693, 7482 feet

Alpha Angle: 30 degrees
