

Lick Creek

Date

Thu, 01/07/2021 - 18:01

Activity

Skiing

Skied Lick Creek around 5 pm, 10-14m of new dense snow, the wind was calm, snowing S1 picking up to S2 as I was exiting. Snowpack on the east side was mostly unconsolidated once off the ridgeline. Sunk in really far while skiing and could put my poles in all the way to the ground basket side down.

Region

Northern Gallatin

Location (from list)

NORTHERN GALLATIN RANGE

Observer Name

Mike Lavery
