Natural in Argentina Bowl

Argentina Bowl Bridger Range 2/17/2022 Code SS-N-R1-D2-I Elevation 8700 Aspect NE Latitude 45.78690 Longitude -110.93500 Notes

From email: "Saw several recent avalanches on the east side of Saddle Peak on my drive up to Bridger this morning. All looked like naturals, I'd guess most were size R1D1 and one R1D2."

GNFAC forecasters saw the same slides which looked to involve the new snow. Most were R1-D1 dry loose and <u>cornice</u> falls, and there was one R1-D2 in Argentina Bowl that was likely a storm <u>slab</u>.
