Notes

From Obs: "I wanted to share about a small avalanche I set off today. Snow was getting warm on my way up 4th of July [couloir](#) (pinwheels coming off lookers right wall started around 11:30) top half took a long time due to deep snow so I was suspicious of the pinch. [Ski cut](#) it during the descent (12:30p) and set off a wet [slide](#) (point release) that picked up quite a bit of steam as it came out the bottom. Big enough to injure/bury a skier."
