

New snow on top of loose snow

Date

Sun, 01/21/2024 - 10:30

Activity

Skiing

Quick skin up to the top of the far south Telemark Meadows point. Lots of thumping in the flat untracked areas up the the top. Cracks not easily seen as dense snow covered them as they spread. Quick Pit, 45cm depth. About 4" of new heavy snow on top of yesterdays sun drenched layer. Below lots of loose facets and 2 distinct frozen layers buried 15-20cm below surface to the ground. 0.3" SWE last night. 24 degree slope, south facing. Air and Snow 30F.

Region

Southern Madison

Location (from list)

Telemark Meadows
