

Natural Avalanche in Beehive Basin

Date

Sun, 03/03/2024 - 14:15

Activity

Skiing

Noticed the pictured recent avalanche on an east facing aspect in the alpine of Beehive Basin. I would estimate it at a D2 size slide. It seems to have been naturally triggered by cornice fall and likely stepped down to older faceted snow deeper in the snowpack.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

Eric Heiman
