

Natural Avalanche on Barronette

COOKE CITY

Cooke City

3/8/2024

Code

N

Latitude

45.02020

Longitude

-109.93800

Notes

From 03/08/2024: On my drive to Cooke City I saw old [slab](#) avalanches in YNP near Mammoth and on Abiathar and Ampitheater among other places. These appeared to have happened earlier in the week. I also saw a more fresh looking persistent [slab](#) avalanche on Barronette, 2-3' deep and as wide as its terrain feature, 100-200' (photo).
