

New Snow Avalanches in the Bridgers

The Ramp

Bridger Range

4/7/2024

Code

SS-AS-R2-D2-S

Elevation

8300

Aspect Range

N-NE

Latitude

45.82880

Longitude

-110.93100

Notes

While skiing near the ramp we saw several skier-triggered storm slabs and loose snow avalanches. Most were R2/D1.5. The largest of these happened south of the Wolverine Cirque below a cliff band, R2/D2.

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Skier

R size

2

D size

2

Bed Surface

S - Avalanche released within new snow

Problem Type

Storm Slab

Slab Thickness

12.0 inches
