

Whumphing in Bacon Rind

Date

Wed, 02/05/2025 - 13:30

Activity

Skiing

Had several large whumphs in windslabs at the top of bacon rind today. Interestingly they only started once a few inches of new snow had accumulated from the cold front. At the end of the day the windslabs are out there with enough load to make them pretty touchy.

No obvious signs of instability where there was no wind loading.

Region

Southern Madison

Location (from list)

Bacon Rind

Observer Name

Wyatt Hubbard
