

A Pair of Small Avalanches on Saddle Peak

Date

Thu, 04/03/2025 - 16:55

Activity

Skiing

I was skiing in bounds on Slushman's lift and saw a pair of R1, D1 avalanches on Saddle Peak. One appears to be a [loose snow avalanche](#) triggered by a skier coming off of north Saddle Peak That ran a couple hundred feet. The second was a small [slab](#) coming out of Spencer's with debris running into Going Home Chute.

There were many tracks across the visible Saddle Peak terrain.

Region

Bridger Range

Location (from list)

Saddle Peak

Observer Name

David Zinn
