

## Large recent wet loose avalanches at Bridger

Bridger Bowl  
Bridger Range  
5/1/2025  
Code  
WL-N-R2-D2  
Elevation  
8000  
Aspect  
E  
Latitude  
45.80840  
Longitude  
-110.93000  
Notes

From obs.: "Saw many recent looking wet loose avalanches on east facing slopes at Bridger. We got a good look at the debris pile from one in Z chute and it looked big enough to bury a person (D2) and had run far past the cat [track](#) into south bowl.

We encountered a lot of variation in ski penetration with ~1' of loose melt forms in places on north and east facing slopes ~8k' in elevation."
